ACCUMULATOR

Features

- No tools required for change over.
- Adjustable for many container sizes.
- Speed adjustable to any Conveyor.
- UHMW rails to avoid scratches on containers.
- Nema 12 electric controls.
- Explosion proof controls available.
- 110VAC Supply Voltage.
- 220VAC Supply available.
- Stainless Steel Construction.

ENGINEERED FOR CONVENIENCE AND VERSITILITY

Packaging Dynamics, Ltd.'s Unscramblers are engineered to provide an organized avenue for feeding containers to our Filling Machines. Coupled with UHMW guide arrangements, containers can be placed on the table surface and they will be correctly delivered to the filling line.

Packaging Dynamics, Ltd.'s Accumulators have proven to be a convenient means of collecting and re-moving filled containers from the filling line in an organized fashion making it much easier for the customer to organize products.

Our *Unscramblers and Accumulators* are constructed of stainless steel which provides for easy cleanups with a minimum amount of down time. The variable speed design provide easy timing with the filling machine conveyor speeds. They can be manufactured with Nema 4 or explosion-proof electrics. *Transfer Plates and Dump Tables* are also available.

Specifications

Container Size Range	2 oz—2 1/2 gal
Drive motor	90 v DC 1/15 hp
Controls	KB Electronics SCR drives
Construction Material	Stainless steel with guide rails and container guides
Overall Dimensions	Varies between 36" to 60"
Electrical Requirements	110v AC / 1Ø / 60 Hz
RPM	0 to 6.5 rpm
Weight	Varies between 85 to 150 lbs model dependant

Options

- ◆ Plastic table tops.
- ◆ Nema 4 electrics.
- ◆ Explosion-proof electrics.
- ◆ Stainless Steel Transfer plates.
- ◆ 220VAC Supply Voltage.
- ◆ Dump table (Unscrambler).
